

Pipe Conveyor Belt

Conventional Conveyor

Pipe Conveyor

Features

Application: Mainly used to transport bulk solids in the Cement, Fertilizer, Coal, Powder, Steel, Pulp and paper, Food grains etc. Pipe conveyors overcome some problems commonly associated with conventional conveyors, e.g. spillage of materials, belt training, limited angles conveyance, horizontal curves and multiple flights.

Carcass: EP, Steel Cord, Kevlar

Cover Grade: Abrasion Resistance, Chemical Resistance, Flame Resistance, Heat Resistance, LRR/SLRR...

Construction

- ※ Maximal pipe belt width up to 3200mm
- ※ Maximal outer diameter of pipe belt up to 900mm
- ※ The pipe diameter should be min. 3 times the lump size.
- ※ The filling degree should be between 60 and 75 %.

Pipe Belt Records

- ※ World longest single pipe belt:
- ※ Double Arrow offered to Huadian Heavy Industries, for North Henan Coal Logistic and Storage project, conveyor distance 15km.
- ※ Indonesia Tower Island ,conveyor distance 8.3km, offered by SICHUAN ZIGONG with Shanxi Phoenix.
